Custom Object Information

= Required Information

The singular and plural labels are used in tabs, page layouts, and reports.
Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label: Student — **Example: Account**

Plural Label: Students — **Example: Accounts**

Starts with vowel sound: ☐

The Object Name is used when referencing the object via the API.

Object Name: Student — **Example: Account**

Description:

the Record Name field is always called "Name" when referenced via the API.

Record Name: Student Name — Example: Account Name

Data Type: Text — **Warning:** If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

- [x] Allow Reports
- [ ] Allow Activities
- [ ] Track Field History
- [ ] Allow in Chatter Groups
- [ ] Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. Learn more.

Custom Tabs

Help for this Page

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Navigation Items
Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.
